

Description: The women's ruffle skirt is a flirty slip-on skirt that can be worn in the club, to an event, or as main stream fashion. We recommend .35mm gauge, however different effects in the flow of the ruffle can be achieved with thinner or thicker gauges.

Difficulty level: Beginner to intermediate.

Recommended gauge: .35mm

Video Tutorial: <http://www.mjtrends.com/tutorial,Basic-Latex-Ruffle>

Cut out the pattern

Step 1: Cut out each pattern piece along the solid lines.

Step 2: Place your pattern pieces face up (the side with the print on it) on top of your material.

Step 3: Cut out your material.

Glue the ruffles to the yokes

Step 4: Glue the front ruffle to the front yoke using a ¼ inch seam. If there the end is not a perfect and the ruffle extends past the yoke, trim the excess. If the ruffle is shorter you will need to re-glue.

Step 5: Just as above, glue to right rear yoke to the right rear ruffle and the left rear yoke to the left rear ruffle.

Glue seams

Step 6: Glue the left rear to the right rear using a ¼ inch seam.

Step 7: Glue the side seams of the front and rear pieces.

Trim

Step 7: If the bottom of the ruffle does not match up perfectly at the seams, carefully trim off any excess.

Glue Waistband

Step 8: With the backside facing up, start with the waistband ¼ of an inch past the end of the rear seam. This will allow the rear seam and the waistband seam lines to match up when you finish.

Scotch tape can be applied to the skirt section 1 inch below the top to ensure

that excess glue does not get on the body of the skirt.

Apply glue to both the waist band and 1 inch of the skirt top, working in 4 to 6 inch sections at a time.

Step 9 Wait 24 hours for your glue to cure. Enjoy!

Legend

Straight lines show where to cut.

Dashed lines represent the space for the seam overlay
